Technical Tools – Supporting FOUNDATION Fieldbus

Reference: FFCEEMC Technical Tools 001

Tool Name: Segment Checker

Application: Planning tool for fieldbus segments

General Description: Segment Checker is an open software tool for planning and validation of fieldbus infrastructure; instruments, power supplies and installation components. The software enables simple click, drag and drop and guides the user validating load conditions and voltage drop at every installation point of the topology. Messages in clear text help create the infrastructure for PROFIBUS PA and FOUNDATION Fieldbus H1 topologies.

Tool Cost: Free of charge

Supplier: Pepperl + Fuchs

Availability: www.segmentchecker.com
