Technical Tools – Supporting FOUNDATION Fieldbus

Reference: FFCEEMC Technical Tools 002

Tool Name: Advanced Diagnostic Module (ADM)

Application: Fieldbus diagnostic tool

General Description: The Advanced Diagnostics Module (ADM) for the Power Hub monitors the physical layer and communication online and in real time. The associated FieldConnex Diagnostic Manager reads and interprets the data from the ADM, creates summary alarms and warning messages and guides the maintenance crew to resolve installation problems before they become a threat to plant operation. This enables pro-active strategies for plant upkeep.

Tool Cost: Charged

Supplier: Pepperl + Fuchs
