Technical Tools – Supporting FOUNDATION Fieldbus

Reference: FFCEEMC Technical Tools 003

Tool Name: Fieldconnex Emerson Integration Package

Application: Tool to integrate Advanced Diagnostic Module into Emerson Process Management AMS.

General Description: The integration tool connects the FieldConnex Advanced Diagnostic Module components into the AMS Suite. This makes the fieldbus physical layer a manageable asset in the application suite of Emerson Process Management.

A setup tool reads the fieldbus configuration from the Emerson system and automatically creates the configuration of all components of FieldConnex Advanced Diagnostics.

Tool Cost: Free of charge

Supplier: Pepperl + Fuchs
