

Registered Device Description (DD) Library

Description

The DD Library contains DD source code that device developers can import and use to build the device description. The source code for all standard FOUNDATION™ fieldbus parameters and blocks is included, in addition to the archives of all registered CFFs and DD files. Manufacturers only need to implement custom block and other manufacturer-specific additional parameters.

Features

- A necessary feature in aiding in the development of device description files for FOUNDATION™ fieldbus devices

Components

- Source code for all standard FOUNDATION™ fieldbus parameters and blocks
- Archive of all currently and previously registered device CFFs and DD files

System Requirements (Platform Independent)

- Windows® XP or newer
- At least 5 MB free memory

About the Fieldbus Foundation

The Fieldbus Foundation is a not-for-profit corporation consisting of over 350 leading process and manufacturing automation companies worldwide whose major purpose is to provide an open and neutral environment for the development of a single, international, interoperable fieldbus. In this environment, end users, manufacturers, universities and research organizations are working together to develop the technology, provide development tools, support and training, coordinate field trials and demonstrations, and enable product interoperability.
